

GOA SENTINEL

AI-POWERED TOURISM REPUTATION COMMAND CENTRE

PREPARED FOR
Goa Tourism Department

Detect. Defend. Dominate the narrative — **before it goes viral.**

THE PROBLEM

A single negative post about Goa can reach **1M+ people in hours**. Across Twitter, Instagram, Reddit, Google Reviews, TripAdvisor, and news — in Hindi, English, Russian, Konkani, German, and 10+ more languages — no team can monitor everything manually. By the time it reaches the minister's desk, the damage is done.

WHAT GOA SENTINEL DOES

Monitors 24/7

6 platforms, 15+ languages, every mention of Goa tourism scanned in real time

Detects Viral Threats

Alerts the minister's office when negative posts cross 10K views — within minutes

Real vs Fake

AI separates genuine tourist complaints from manufactured bot attacks & competitor sabotage

Auto Counter-Narrative

Drafts 3 data-backed response options for every threat, ready for the social team to post

Live Dashboard

Sentiment scores by week, month, season — one screen for the minister's office

HOW IT WORKS

WHO BENEFITS

- **Minister's Office**
Early warning system — respond in minutes, not days
- **Social Media Team**
Pre-drafted responses ready for approval and posting
- **Tourism Department**
Data-driven satisfaction view by season, source & language
- **Crisis Management**
Coordinated attack detection prevents overreaction to fake narratives

BY THE NUMBERS

<2min

Alert latency from detection to minister notification

6 / 15+

Platforms monitored / Languages supported

<60sec

Counter-narrative drafted per threat

24/7

Automated monitoring, zero manual scanning
